Objective

Full-stack developer skilled in React, Express, and MongoDB, with a focus on building impactful web apps. Eager to contribute and learn in fast-paced environments.

Work Experience

Web Development Intern, Thought Grains Solutions Jun 2024– Aug 2024 Udupi, Karnataka, India

- Developed responsive company landing pages using React.js, improving page load time and cross-device compatibility.
- Integrated interactive UI components and collaborated with designers for user-friendly layout.

Education

N.M.A.M. Institute of Technology, B.Tech in Computer Science
- GPA: 8.62/10

Projects

Note App   Demo
- full-stack note-taking app used by students to store and manage code snippets and academic notes.
- Implemented CRUD features, tag-based search, copy-to-clipboard
- Stack: **React.js**, **Express.js**, **MongoDB**

Task Manager   Demo
- Built a comprehensive task manager application that enables users to efficiently create, edit,and delete tasks, ensuring a seamless experience in managing their workload..
- Added JWT-based auth, user isolation, priority, and due date features.
- Stack: **Astro.js**, **Actix Web**, **MongoDB**

Hangman Game   Demo
- Designed a responsive Hangman game using React.js.
- Focused on enhancing user engagement through interactive gameplay and immediate feedback.

Technologies

Languages: JavaScript, TypeScript, Rust, Java.
Frontend: React, Astro, TailwindCSS, HTML5, CSS3.
Backend: Node.js, Express.js, Actix Web.
Tools: Git, GitHub, Docker.
